How is my status determined?

Your Loyalty Status is determined based on the total number of accumulated closed lots at the end of each calendar month. This status will then apply for the following month. The status levels and their corresponding lot requirements are as follows:

Status	Total Closed Lots Required
Silver	0 – 19.99 lots
Gold	20 – 499.99 lots
Platinum	500 – 4,999.99 lots
Diamond	More than 5,000 lots

For example, if you accumulate 530 closed lots by the end of June, you will be upgraded to 'Platinum' status for the month of July, as you have exceeded the threshold of 500 lots. This system ensures that your status accurately reflects your trading activity and engagement with the platform. Additionally, in the ‘Loyalty Program’ section of the User Portal, you can view your predicted status for the following month based on your current balance of points. This feature helps you track your progress and plan your trading activities to achieve higher status levels and enjoy greater benefits.
