What is the Market / Trading Hours?

Trading · https://maintest.windsorbrokers.com/knowledge-base/trading/what-is-the-market-trading-hours/

Market or trading hours refer to the specific time frames during which a financial instrument can be traded. These hours determine when you can open or close trades. Trading hours vary depending on the financial market and the instrument being traded.
To view the trading hours of each financial instrument on the Windsor Brokers MT4 or MT5, follow the below steps:
1. Log in to your MT4 or MT5 trading platform.
2. Right-click on the financial instrument you are interested in.
3. Select "Specifications" from the context menu.

Additionally, you can refer to the "Product Outline" page on our website for detailed information on trading hours for various instruments.

Important Note: Trading hours displayed on the MT4 or MT5 platform are based on the trading server time, which is UTC+2 during wintertime and UTC+3 during summertime.
